Professional Summary

Computer Science graduate from BRAC University, looking to build a long-term career where I can use technology to solve real problems. I bring hands-on experience in IT support and project management, along with project work in data analysis, machine learning and web development. I learn quickly, work well in teams, and want to keep growing my skills while taking on more responsibility.

Experience

Executive – IT Apr 2026 – Sep 2026
Department of Information & Technology | Bengal Media Corporation Ltd. (Rtv), Dhaka

- Gave technical support to staff and fixed hardware, software, network and system issues across departments.
- Maintained IT systems, network infrastructure and user accounts so daily office and broadcast work ran without breaks.
- Managed the organisation's technology resources, including computers, accessories and software access.

Project Manager Sep 2025 – Jan 2026
Department of Pharmacology | Bangladesh Medical University, Dhaka

- Led work to modernise clinical pharmacology teaching, including lab setup and new digital platforms and tools.
- Coordinated between researchers, teachers and clinicians to keep the project on track.
- Improved how the department collects and analyses data, making reports easier to prepare and share.

Education

B.Sc. in Computer Science | BRAC University, Dhaka Jan 2021 – Nov 2025

- **CGPA:** 3.23 / 4.00

Higher Secondary Certificate | Rajuk Uttara Model College 2020

- **GPA:** 5.00 / 5.00

Secondary School Certificate | Rajuk Uttara Model College 2018

- **GPA:** 5.00 / 5.00

Projects

- **Multimodal Bridge Framework for Gene Regulatory Network Discovery** – Developed a dual-encoder model that brings CRISPR screening data and RNA-seq gene expression data into a shared space. The framework links the two data types to uncover biologically meaningful, tissue-specific gene regulatory networks.
- **Vegetation Detection Using Satellite Imagery** – Worked with satellite images to detect and map vegetation cover in an area. The work was done step by step in a series of task notebooks, from preparing the images to analysing them and showing the results visually.
- **EDA Selling Price Prediction** – Explored a multi-store retail sales dataset to find the key factors that affect selling price, such as product category, cost price, quantity and shopping location. Cleaned the data, encoded categorical features and trained models to predict selling price accurately.
- **Behaviour-Based Grade Prediction** – Built a full prediction pipeline that turns raw records into outcome predictions. Handled missing and invalid values, explored patterns with visualisations, and compared six classification models (Logistic Regression, KNN, Decision Tree, Random Forest, AdaBoost and Linear SVM) to find the best performer.

- **Eat The Fish Game** – A simple interactive game where the player controls a fish that eats smaller fish to grow bigger while avoiding larger predators. Built the player controls, the game loop and the grow-or-get-eaten logic that makes each round more challenging.
- **E-Commerce Website** – An online platform where users can browse products, place orders and manage their orders securely and efficiently. Set up user accounts and a database to store products, customers and orders.
- **Online Library Management System Website** – A web platform to manage books, users and library activities such as borrowing and returning books online. Designed the database schema and ER diagram, and built a clean, easy-to-use interface for librarians and members.

Technical Skills

- **Programming & Data:** Python, pandas, NumPy, scikit-learn, Matplotlib, Seaborn, Jupyter / Google Colab, Looker Studio
- **Web & Databases:** Django, HTML, CSS, Bootstrap, jQuery, MySQL, SQLite
- **IT Support:** Hardware and software troubleshooting, network support, user account management
- **Tools:** Git & GitHub, Microsoft Office, Google Workspace, Prompt Engineering

Soft Skills

- **Working with People:** Communication, Leadership and Teamwork, Conflict Resolution
- **Thinking & Problem Solving:** Analytical and Strategic Thinking, Problem Solving, Attention to Detail
- **Work Style:** Time Management, Adaptability

Extracurricular Activities

Chief of Execution | BRAC University Adventure Club Jun 2021 – Mar 2025
BRAC University

Senior Executive | BRAC University Business Club Jun 2021 – Mar 2023
BRAC University

Certifications & Languages

- **Certifications:** Presentation Skills (BRAC University), Improving Communication Skills (Coursera), Understanding Prompt Engineering (DataCamp)
- **Languages:** English – Fluent (IELTS 6.5), Bengali – Native
